

Assignment Title: Brand Launch Visual Campaign with Canva

Objective:

Demonstrate proficiency in basic Canva functionality by creating a cohesive, multi-format visual campaign for a fictional product launch.

Scenario:

You are a digital communications intern at "AquaPure," a new eco-friendly reusable water bottle brand. The marketing team has asked you to design the visual assets for the brand's official social media launch using Canva. Your designs must be consistent in style, reflect the brand's sustainable identity, and engage the target audience of environmentally conscious 18–35-year-olds.

Required Deliverables (use Canva only):

1. **Instagram Post** – 1080 × 1080 px static image announcing the product launch.
2. **Facebook Cover Photo** – 820 × 312 px static image incorporating brand elements.
3. **Instagram Story Teaser** – 1080 × 1920 px, 15-second video/animation highlighting a key product feature.

Mandatory Canva Features to Use:

- A template as a starting point (choose any, then modify thoroughly).
- Custom text with at least two different font pairings, including one text effect (e.g., shadow, lift, hollow).
- Uploaded external image(s) (product shot/background) edited with Canva's photo tools (e.g., background remover, filters, adjustments).
- At least three different element types (shapes, icons, illustrations, photos) from Canva's library.
- Simple animations applied to the video story (entry/exit animations on text or elements).
- A consistent color palette and visual style across all three deliverables.

Brand Assets Provided (to be recreated or simulated):

- Logo: A simple wordmark “AquaPure” in a clean sans-serif font, colored teal (#008080).
- Tagline: “Drink Refreshed. Live Sustainably.”
- Product: A sleek, stainless-steel water bottle with bamboo cap; you may use royalty-free placeholder images.

Constraints:

- Only Canva’s free version features may be used.
- No pre-made “complete” templates that already contain all required elements – significant customization is expected.
- All visuals must be original arrangements; no copying of existing brand campaigns.

Submission Instructions:

- Provide shareable “view and edit” Canva links for each design.
- Export and upload the final files:
 - AquaPure_InstaPost.png
 - AquaPure_FBCover.png
 - AquaPure_Story.mp4
- In a separate document, list the Canva features used and the specific tool/location where each was applied (e.g., “Background Remover – Effects tab, applied to uploaded water-bottle photo”).

Evaluation Focus:

Your submission will be assessed on successful execution of the listed Canva functionalities, consistency of visual identity, clarity of communication, and adherence to the specified formats and constraints.
