Q2. [10 Marks]

Available principles: Multimedia Principle · Coherence Principle · Signaling Principle · Redundancy Principle · Spatial Contiguity Principle · Temporal Contiguity Principle · Segmenting Principle · Personalisation Principle

Extraneous processing is a primary obstacle to effective multimedia learning. Using Mayer's (2021) framework, critically examine the following five principles designed to reduce extraneous cognitive load:

- Conclude with a brief design proposal (~150 words) for a multimedia module on 'Computer Network Topologies' that applies ALL five principles simultaneously.
