

Mobile Application Development Assessment

(Research-Based Practical Evaluation)

Course: Mobile Application Development (Flutter / React Native)

Assessment Type: Research-Based Practical Assessment

Duration: 45 Minutes

Total Marks: 50

Mode: Individual Assessment

Devices Allowed: Mobile Phone (Mandatory if available) / Laptop (Optional)

Internet: Required

Submission: Printed Answer Sheets with Printed Research Evidence

Assessment Title

Comparative Research and Analysis of Modern Cross-Platform Mobile Applications

Objective

The objective of this assessment is to evaluate students' ability to conduct research, analyze modern mobile applications, understand Flutter and React Native technologies, evaluate UI/UX design, and provide evidence-based technical observations.

Assessment Scenario

You have joined a software company as a **Junior Mobile Application Developer**.

Your project manager has assigned you to quickly research successful cross-platform mobile applications before the development of a new client project.

Your responsibility is to prepare a concise professional report supported with authentic screenshots.

Instructions

Students may use

- Google Play Store
- Official Application Websites
- Flutter Showcase
- React Native Showcase
- GitHub (Official Projects)
- Google Search

IMPORTANT SUBMISSION REQUIREMENTS

Every answer must contain printed proof.

Examples include

- Google Play Store Screenshots
- Application UI Screenshots
- Official Website Screenshots
- Developer Information
- User Reviews

No proof = Zero Marks

Question 1 (10 Marks)

Mobile Application Research

Research **TWO** mobile applications developed using **Flutter or React Native**.

Prepare a comparison table containing

- Application Name
- Category
- Framework (Flutter / React Native)
- Developer
- Rating
- Downloads

Required Proof

- Google Play Store Screenshot
- Rating Screenshot
- Downloads Screenshot

Question 2 (10 Marks)

Features Analysis

Select **ONE** application.

Identify

- Main Purpose
- Three Major Features
- Navigation Style
- Authentication Method
- Target Users

Required Proof

Minimum **3 Application Screenshots**

Question 3 (10 Marks)

UI / UX Evaluation

Analyze

- Home Screen
- Navigation
- Color Theme
- Icons
- Buttons

Suggest **TWO improvements**.

Required Proof

Minimum **4 UI Screenshots**

Question 4 (10 Marks)

Technical Investigation

Research and identify

- Development Framework
- Backend Technology (if available)
- Database
- Platform Support
- Offline / Online Capability

Required Proof

Official Website or Developer Information Screenshot

Question 5 (10 Marks)

Professional Recommendation

Based on your research, recommend

- Best Mobile Framework
- Best UI Design
- Best Navigation Style
- Best Backend Technology
- Best Overall Application

Justify each recommendation briefly.

Support your answer using collected screenshots.

Submission Checklist

Students must submit

- ☐ Cover Page
- ☐ Student Information
- ☐ Printed Answer Sheets
- ☐ Printed Screenshots
- ☐ URLs Mentioned
- ☐ References

Marking Rubric

Criteria	Marks
Research Quality	10
Application Analysis	10
UI/UX Evaluation	10
Technical Investigation	10
Supporting Evidence & Presentation	10
Total	50

Learning Outcomes

After completing this assessment, students will be able to:

- Research real-world Flutter and React Native applications.
- Analyze mobile application features and user interfaces.
- Investigate mobile application technologies.
- Compare cross-platform development approaches.
- Present professional research findings supported by authentic evidence.
